

pushTAN: Instructions for activation

Start the registration as described below only when you have received your registration data. (As letter or SMS)

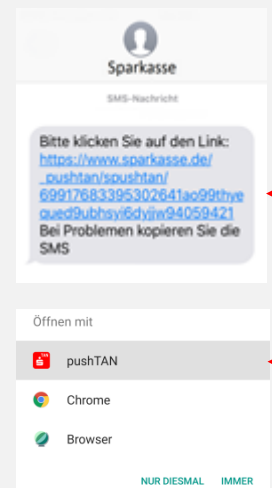

If necessary you will receive a PIN-letter by separate post as well which contains a new Start-PIN.

1 Make sure that the free S-pushTAN-App from the App Store is installed on your mobile device.

2 Go on with the next step, depending on how you received the registration data.

Open the S-pushTan-App and choose a password, if you are asked to. Choose „Mit Registrierungsbrief starten“ and scan the **QR Code** printed in the registration letter or use the manual entry.

Open the **link** from the SMS inside the S-pushTan-App (do not use your browser). Choose a password.

3 Your personal **activation code** (“Freischaltcode”), which you need in Step 5, is now displayed in the S-pushTAN-App.

4 Now use the browser (don't use the S-App) on your PC, tablet or smartphone to login to your Sparkasse Online-Banking. To do this, use the **“Anmeldename”** stated in the registration letter or the **“Legitimations-ID”**. Or when you received SMS the known credentials. If you have received a new PIN by separate letter, please use this to login.

5 After logging in, you will see that you can activate the pushTAN connection. Click on **“Jetzt Freischalten”** (Activate now) and enter your personal activation code (**“Freischaltcode”**) from the S-pushTAN-App.

6 Activation is now complete. If you have logged in with a new PIN, Online-Banking will ask you to change the PIN. The TAN required for this will be sent to the S-pushTAN-App.

Important: If you want to use pushTAN with the Sparkassen-App or financial software like StarMoney, you still have to setup these for pushTan. You can find further instructions about this at the Online-Banking of your Sparkasse.
